Latakia, Syria

SUMMARY

Dedicated Full Stack Developer with two years of experience in creating dynamic web applications. Proficient in JavaScript, HTML, CSS, and Python, with expertise in web development frameworks like Next.js, NestJS, Angular, React.js, Express.js, and Django. Skilled in CI/CD pipeline management and cloud services including IBM Cloud, AWS, and GCP. Currently pursuing a degree in Information Technology at the Syrian Virtual University. Experienced in Linux system administration, C++, and C#, along with tools like Nginx and Gunicorn. Passionate about leveraging technology to solve problems and continuously expanding my skill set.

EXPERIENCE

Full Stack Developer

G6 Company

02/2020 - Present USA, North Carolina

A Tech solution provider

- Developed user interfaces using **Nestjs** and **Angular**, incorporating styles from various templated React libraries and creating custom styles with **CSS** and **Tailwind CSS**.
- Built backend services with **Django** and occasionally with **Nestjs**, focusing primarily on front-end development with Nestjs. Configured traffic balancers to optimize application performance using **Nginx** in conjunction with **PM2** for Next.js front ends and **Gunicorn** for Django back ends.
- Set up cloud infrastructure for website hosting on **AWS**, primarily utilizing **EC2 instances** and **AWS Amplify** with **Lambda** functions for serverless applications.
- Implemented **CI/CD** pipelines using **GitHub Actions** for version control and streamlined code deployment.
